VP / Strategy Orientation
and Innovation

HEALTH SECTOR

AAZ LABORATORIES, MANUFACTURER AND DISTRIBUTOR OF IN VITRO DIAGNOSTIC MEDICAL DEVICES.

“With the successive confinements in the last 2 years, the adoption of the Zeendoc solution has been accelerated.”

Mme Candice
Couloc'h

THE NEED

At the beginning of 2020, Mrs. Couloc'h wanted to **advance the digitalization of her company** in order to achieve greater efficiency. Zeendoc proposed this service of **digitalization of documents** to facilitate their recording, filing, archiving and retrieval.

The tool saves them time on a daily basis in the search for documents, their registration (invoices, expense claims) and storage space in the company.

“No need for filing cabinets, everything is accessible via the computer!”

THE IMPLEMENTATION

To meet the needs of the AAZ company, we set up, with **our Zeendoc EDM solution**, a system for archiving the company's paper and digital documents in a single document data base, and established approval procedures between the various participants.

■ **Improved management of supplier invoices.**

More than 2000 supplier invoices are received annually by our customer. Zeendoc has simplified their entry. From now on, they are **automatically recognised and indexed** within Zeendoc, which allows them to save time and avoids data entry with their accounting software.

Gateways between accounting and order management software have been set up to **automate data entry and processes.**

The search for an invoice is done very quickly and avoids the need to archive papers. Even the accountant has his own access to the platform and can search for invoices remotely, which represents a **saving of time and money** for the company.

“Zeendoc is an innovative solution that saves time and reduces paper storage.”

THE RESULTS

People from different departments (management, accounting, sales, marketing, sales administration and purchasing) use Zeendoc. With the successive confinements of the last 2 years, the adoption of the Zeendoc EDM solution has been accelerated.

“The support and responsiveness of the after-sales service is much appreciated!”

■ Simplification in the management of expenses

In just a few clicks, employees photograph their expense receipts and deposit them in their Zeendoc cabinet, which will **automatically recognize the essential data** (dates, provider, amounts...). The expenses are recorded in the accounts and assigned to the relevant approver. A simple check and changeover is all that is required to integrate them into the accounting software. **This saves a considerable amount of time** for all operations (data entry, filing, processing, transmission, etc.).

■ Digitalization of pay slips.

Sending and archiving payslips is now simpler, faster and more secure. The digitalization of pay slips has made it possible to gain in productivity with optimised processing, automated distribution of pay slips to employees and simplified archiving. Employees have secure access to their pay slips in their personal space and a copy is archived in their personal digital safe for a period of 50 years.

Zeendoc has saved time and storage space but is also part of a new approach to modernize the company.

“I was particularly keen to go into a 100% French partnership with Zeendoc in order to promote French know-how, a value that our two companies have in common.”
