

CLIENT TESTIMONIAL

WWW.ZEENDOC.CO.UK

Activity:

The VIMEU VERT pharmacy, located in Oisemont, is a local pharmacy

Number of employees: 14

Number of inhabitants: > 1200

Testimonial:

Mr Romain Crété, manager of this pharmacy

PHARMACY SECTOR

How Zeendoc has facilitated the processing of the company's supplier invoices saving time, space and generating tangible savings."

NEEDS

Following the departure of a secretary, our client wanted to optimize the time for prescription preparation. The company therefore decided to facilitate the processing of supplier invoices in order to enable them to recruit a chemist.

Saving time on time-consuming tasks with no added value for its business was also an objective for the VIMEU VERT Pharmacy, so standardization of their practices was necessary.

IMPLEMENTATION

To meet the needs of our client, a supplier file within our Zeendoc solution was set up, which would allow :

- Recognition of invoices;
- Automatic indexing;
- Expert search for invoice retrieval.

A real change, the simplicity of Zeendoc has allowed users, and the pharmacists who set it up to adapt it perfectly to their way of working."

A validation circuit has been created to facilitate the control of invoices and their sign off.

The accountant has direct access to extract invoices directly using the date of issue as a criterion, which also simplifies and speeds up the calculation of VAT.

RESULTS

Once the Zeendoc EDM solution was implemented and adopted by the various users within the company, our client explained to us which daily tasks were made easier:

- Searching for invoices previously done only on paper;
- Checking and validating invoices;
- Opening and managing of the pending paper mail;
- Communication with the accountant : his monthly trip to collect all the invoices has been eliminated.

WWW.ZEENDOC.CO.UK

PHARMACY SECTOR

This simplification of processes represents a real time saving for the company. In addition, our client also noted a saving in storage space equivalent to 3 large boxes per year thanks to the digitalization of data, as well as the renegotiating his accounting fees.

The implementation of our Zeendoc solution within the VIMEU VERT pharmacy has therefore enabled the company to save time, storage space and money, and to optimise work processes in order to avoid wasting time on tasks that have no added value.

THE FUTURE:

The digitalization of pay slips may be developed in the future according to Mr Crété, who also says he is ready to recommend us, putting forward three key points :

- Simplification of work;
- Elimination of time-consuming tasks;
- Users independence for searching.

“ It is a real communication tool for the different professions. Zeendoc allows each individual concerned by the information contained in the documents to be fully operational, inside or outside the pharmacy in a secure manner. ”
